Pleat when layers sewn together

3 times when layers sewn and turned the right way out

Leave gap here when sewing up so you can turn the mask the right way out

Trap ends of elastic in seam when top stitching

Sew a thin channel (red dotted line) for wire (a straightened paperclip) after turning the mask the right way out

Two layers of fabric (right sides together) with a sheet of filter material (if used) on top

Sew along black dotted line

Elastic

Removeable Filter Ideas
1. Coffee filter
2. Piece of clean vacuum cleaner bag

(leave gap open at bottom for access, use Velcro to close?)

Sew-in Filter Ideas
1. "J-cloth"
2. Plastic bag

Leave gap
